

FOR IMMEDIATE RELEASE

Cardinal Health, ECRS and PAR Announce Integrated Retail Automation System

Complete Retail Automation Solution Provides Cardinal Health Leader Pharmacies with Automated Inventory Ordering, Receiving, and Promotional Coordination. Solution Dynamically Integrates Independent Pharmacies to the Cardinal Supply Chain for Operational Cost Reductions, Increased Revenue and Greater Customer Satisfaction

Las Vegas – July 25, 2006. Today at the Cardinal Health Retail Business Conference, ECR Software Corporation (ECRS), Cardinal Health and PAR Technology Corporation announced a strategic alliance. The companies have joined forces to create a unique solution to provide supply chain and marketing automation for Cardinal Health and its independent retail pharmacy customers. The system allows independent pharmacies to automate the replenishment of merchandise using modern statistics-based reordering methodologies. Orders are transmitted electronically in a bi-directional manner, providing precise coordination of cost/quantities for merchandise ordered and shipped between the Cardinal Health warehouse and the independent pharmacy. All orders and deliveries are tightly tracked for timely notifications on the status of all orders at all points in the supply chain. On the demand side, the system provides complete promotional automation. Participating pharmacies receive automatic promotional updates to their pricing each month. Once approved at the store-level, promotions automatically start and end during the designated promotional period.

The software is bundled with PAR Technology Corporation's ViGo Xi POS terminal. Supported by a world-class international service organization, ViGo is a retail-hardened terminal that features an integrated customer billboard that serves as a dynamic multimedia system for displaying brand promotions to consumers during checkout.

According to Jeff Thomas, VP of Retail Marketing and Product Development for Cardinal Health Pharmaceutical Supply Chain Services, "The Cardinal Health team has worked closely with ECRS and PAR to create this powerful automation solution for our retail customers. The automated inventory reorder capability and its direct link to the Cardinal Health inventory system will drive profitability for our retail partners by significantly reducing labor costs and dramatically increasing accuracy."

"As we continue to roll out more and more Cardinal Health retail customers with this new system," explained Pete Catoe, ECRS President, "feedback continues to be strong, especially with regard to the automated ordering and receiving, real-time Leader brand promotion updates, and automated perpetual inventory. This technology essentially levels the supply chain playing field by empowering independent pharmacies with the tools they need to successfully compete against larger retailers."

"We are excited to be involved in this innovative project with ECRS and Cardinal Health," commented John W. Sammon, Chairman and CEO of PAR Technology Corporation. "As a primary component in this comprehensive solution for Cardinal Health's independent customers, the ViGo represents a durable, stand-alone POS terminal that is a perfect match for their independent retailers. The unit's integrated LCD customer display provides a convenient built-in system for branding Cardinal Health's retail promotions to consumers at the front end. This is truly a win/win opportunity."

About Cardinal Health

Cardinal Health, Inc. (www.cardinal.com) is the leading provider of products and services supporting the health care industry. Cardinal Health develops, manufactures, packages and markets products for patient care; develops drug-delivery technologies; distributes pharmaceuticals and medical, surgical and laboratory supplies; and offers consulting and other services that improve quality and efficiency in health care. Headquartered in Dublin, Ohio, Cardinal Health employs more than 55,000 people on six continents and produces annual revenues of more than \$75 billion. Cardinal Health is ranked No.16 on the current Fortune 500. For more information go to www.cardinal.com.

About ECRS

Headquartered in Boone, NC, ECRS has been providing best-of-breed automation solutions to the retail industry since 1989. The ECRS retail framework includes point of sale, self-checkout, back office, inventory management, order forecasting, supply chain automation, fuel pump interface, integrated video surveillance, digital customer billboard, self-hosted gift card, signature capture, wireless hand-held terminal interface, and a range of other retail automation components.
